

DISCOVER VERIFICATION

3rd Party Verification brings us face-to-face with a project's contractors, systems, and assemblies. Our Verification team collaborates with the construction team to assure quality installation and performance of building systems. Commissioning and Rating help achieve a balance between building performance and return-on-investment translating designed efficiencies into real operational savings.

COMMISSIONING

California Title 24 Commissioning

LEED Fundamental Commissioning

LEED Enhanced Commissioning

ASHRAE Guideline 0 Total Building Commissioning

ASHRAE Guideline 1 HVAC&R Commissioning

NIBS Guideline 3 Building Enclosure Commissioning

Residential Central Systems Commissioning (LEED for Homes)

Re-Commissioning

On-Going Commissioning

RATING

Energy Benchmarking

ASHRAE Level I Audits

ASHRAE Level II Audits

ASHRAE Level III Audits

ENERGY STAR Construction Inspections

Thermal Enclosure System Rater Checklist

HVAC System Quality Installation Rater Checklist

Water-Managed Construction Checklist

Indoor airPlus Verification Checklist

SWPPP Measures Observation

Home Energy Rating System (HERS)

California Energy Commission (CEC)

Residential Energy Services Network (RESNET)

HERS I – Alterations and Newly Constructed Homes

HERS II – Whole House Rater

HERS Solar Photovoltaic

HERS Utility Rebate Program EEM Verifications

Diagnostic Testing

Building Envelope Air Leakage

Quality Insulation Installation (QII)

Existing Conditions Verification (HERS II)

Duct Leakage Measurement

Low Leakage Ducts in Conditioned Space

Low Leakage Air-Handling Units

Duct Location Verification

Forced Air System Fan Efficacy

Forced Air System Airflow Rate

Refrigerant Charge Verification

Rated Space Conditioning System Verification

Whole Building Ventilation Airflow

Verified Duct System Design

Duct Surface Area Verification

Buried/Deeply Buried Duct Verification

Hot Water System Distribution/Recirculation

Combustion Safety Testing
